

## Apullmas Superclean hinge plate conveyor

# Spic and spam due to a frame construction of stainless steel

Our SuperClean stainless steel hinge plate conveyor belts are specially prepared to the highest hygienic requirements for the food industry as well as the chemical and pharmaceutical industries. The hinge plate conveyor belts, of plastic link chains or hinged steel bands from PU or PVC, offer a rust free stainless steel construction. The combination construction of frames and tubular technology has no edges the might collect dirt or dead spaces.

### Benefits at a glance

- Fulfils the highest hygienic requirements
- All-round access due to frame construction
- Easy to clean tubular technology
- A single handle on the pulley allows for the belt to stretch and loosen
- Certifiable to EHEDG standards
- Plastic link chain or hinge plate conveyor belts made from PU or PVC
- Designed to customer specifications
- Use of Stainless Steel
- Also driven by drum motors
